## Skillset

- Front-end: React, Next.js, Angular, Laravel, and mobile technologies including Flutter, React Native, and Native Java
- Back-end: NodeJS, Python, Spring Boot
- AI: OpenAI, LLM

## Experience

**ELARA AI • Junnior Front-end developer • 2016 - 2018**
I started at Elara AI when the company was struggling, using my love for art and drawing to dive into front-end development. I began with Angular and built a hotel booking website, which showcased my skills and helped me grow as a developer.

**ELARA AI • Software developer with Fullstack • 2018 - 2021**
I decided to master backend frameworks by building several large platforms, significantly enhancing my skills in Node.js and Express. My goal is to become a preferred full-stack developer. Throughout this journey, I integrated third-party APIs, chatbots, Firebase, and AWS, gaining valuable experience along the way.

**ELARA AI • Attended to Web3 & Be a core developer • 2021 - 2022**
I participated in web3 projects, developing casino games and dApps while integrating smart contracts. However, as our company grew, I decided to shift my focus from web3 to AI, recognizing the immense potential of OpenAI. Inspired by its capabilities, I enrolled in courses to enhance my skills, becoming a code developer for a team. During this time, I worked on projects like Starlink and tackled terminal problems, further expanding my expertise.

**Freelance • Senior software engineer • 2022-Present**
Il began freelancing in 2022 on platforms like Upwork and Freelancer, where I built several platforms and services that helped me grow my skills, especially in AI. I developed Galler-ai, enhancing its AI model capabilities and achieving successful integration. I'm currently studying Large Language Models (LLM) and deepening my knowledge in this exciting area. Everything is going well!

## Education

**Bachelor of Science in Computer Science**
**Stanford University**
**Stanford, CA**
**Graduated: June 2015**
**GPA: 3.7/4.0**
**Relevant Coursework: Data Structures and Algorithms, Machine Learning, Web Development, Database Systems**

## Additional Work History

**Senior Data Engineer – qlinary.com – 04/2015 to 05/2016**
**Senior Database Architect – Certain, Inc., San Francisco, CA – 2013 to 2014**
**Data Architect, Database & Reporting Manager – Deutsche Knowledge Service, Manila Philippines – 2010 to 2011**

## Projects

**Galller-ai**
Galler-ai is an innovative web platform that harnesses the power of OpenAI to generate stunning images based on user prompts.
https://gallerai.ai   React, GraphQL, GenAI, NodeJS

**Bestinform**
Bestinform is a robust booking platform focused on European travelers, providing fast and accurate reports for hotel and restaurant bookings.
https://www.bestinform.eu   Angular, SpringBoot, MySQL, Firebase

**Starlink**
I developed a terminal status control system for a website built with WordPress and Node.js. The system captures signals sent from terminals located in Alaska to our server, allowing us to monitor and control them effectively
https://www.starlink.com   Wordpress, NodeJS, MongoDB, Rest API
